95% of data breaches are down to human error

- If it looks phishy, it probably is!
- "Dear User" or "Hello Friend"
Sounds like a bad blind date opening, not a legit email.
- "Respond NOW, or lose everything forever!" (Pro tip: Don't.)
- Does "paypal.secure-login-check.net" look dodgy?
Trust your gut.
- "Tell us your password, please!"
Sure, right after I hand over my credit card and mum's maiden name.
- Bad logos that need a makeover.
If it looks like a five-year-old designed it, hackers probably did
